### Summary

Mostly interested in computational approaches to understand host-pathogen interactions. Trained in Genomic Sciences I soon got into bioinformatics and computational biology. After the university I worked on antibody repertoires to compare immunologic challenges. In 2013 I started a masters at the University of Basel and performed my thesis at the National University of Singapore working with lipidomics data from clinical isolates of malaria patients. Currently, I am on my last year of my PhD working on Short Linear Motifs at the host-pathogen interface.

### Education

- 10/15 - today **Ph.D. in Molecular Biology**, European Molecular Biology Laboratory / University of Heidelberg, Heidelberg, Germany.
- 09/13 - 02/15 **Joint Master Programme in Infectious Diseases, Vaccinology and Drug Discovery**, University of Basel and the National University of Singapore, Switzerland and Singapore.
- 08/07 - 06/11 **B.Sc. in Genomics Sciences**, National Autonomous University of Mexico, Cuernavaca, Mexico.  
With honours.

### Research Experience

- 10/15 - today **PhD Student**, European Molecular Biology Laboratory, Heidelberg, Germany.
- Advisor: Dr. Toby J. Gibson.
  - Computational screening for Eukaryotic Short Linear Motifs being mimicked in bacterial proteins. Two publications.
  - Computational prediction of Linear Motifs at the *Plasmodium*-Host interface.
- 01/14 - 02/15 **Master thesis**, Vivax Malaria Lab, National University of Singapore, Singapore.
- Advisors: Dr. Bruce M. Russell and Prof. Dr. Markus R. Wenk.
  - Data analysis of Mass Spectrometry and Tandem Mass Spectrometry experiments to identify characteristic lipids of *Plasmodium vivax*-infected human reticulocytes. Thesis.
  - Bioinformatics analyses to study receptor-ligand interactions during *Plasmodium vivax* reticulocyte infection. One publication.
- 10/12 - 07/13 **Research Assistant**, National Institute of Public Health, Cuernavaca, Mexico.
- Advisor: Dr. Jesus Martinez-Barnetche.
  - Bioinformatics analysis of high-throughput sequencing data from human and murine lymphocyte antigen receptors challenged with inactivated viruses or bacterial pathogens, respectively. Three publications.
- 01/12 - 09/12 **Bioinformatics Consultant**, Winter Genomics (<http://www.wintergenomics.com>), Cuernavaca, Mexico.
- Advisor: Dr. Enrique Morett.
  - Genome assembly, annotation and structural variation analysis of two *Babesia* species under two growth conditions. Bioinformatics analysis service at the Winter Genomics start-up.

- 08/10 – 12/11 **Undergraduate Research Assistant**, Center for Genomic Sciences, National Autonomous University of Mexico, Cuernavaca, Mexico.
- Advisor: Dr. Esperanza Martinez-Romero .
  - Phylogenetic analysis of cospeciation events between scale insects and their symbiotic bacteria. One publication.

## Scientific Publications

\* Contributed equally.

- Sampietro, D., **Sámano-Sánchez, H.**, Davey, N.E., Sharan, M., Meszaros, B., Gibson, T.J., Kumar, M. Conserved SQ and QS motifs in bacterial effectors suggest pathogen interplay with the ATM kinase family during infection. *biorXiv*, 2018. doi: 10.1101/364117

## Awards and Scholarships

- Travel Fellow Award from the National Institute of Allergy and Infectious Diseases to attend the 5th International Conference of Research on *Plasmodium vivax* Malaria.
- Travel Fellow Award from the Fundação de Amparo à Pesquisa do Estado de São Paulo to participate in the Science of Eradication: Malaria course in Sao Paulo, Brazil.
- Scholarship from the Swiss Tropical and Public Health Institute to study the Joint master program on Infectious Diseases, Vaccinology and Drug Discovery.

## Talks and Posters

### Invited talks

- Institutional seminar at the Biotechnology Research Institute (IIB), National University of San Martin (UNSAM), Buenos Aires, Argentina, 2017.

### Selected talks

- Cold Spring Harbor Asia Conference: Bacterial Infection and Host Defense, Suzhou, China, 2019.
- VIII Argentinian Bioinformatics and Computational Biology Congress, Posadas, Argentina, 2017.
- 5th International Conference of Research on *Plasmodium vivax* Malaria, Bali, Indonesia, 2015.

### Poster presentations

- EMBO Workshop on Molecular advances and parasite strategies in host infection, Les Embiez Island, France, 2018.

- EMBO Conference on Hijacking host signalling and epigenetic mimicry during infections, Paris, France, 2017.
- 2nd Interdisciplinary signaling workshop, Visegrad, Hungary, 2017.
- The modularity of signaling proteins and networks, Seefeld, Austria, 2016.

## Teaching

### Mentor

- Master thesis supervisor of Davide Sampietro, Erasmus student from Universitá deli Studi di Milano - Bicocca, 2018.

### Organizer

- Bioinformatics Tools for Protein Structure, Disorder and Interaction Analysis, National University of San Martin, Buenos Aires, Argentina, 2017.

### Lecturer

- Protein bioinformatics part of EMBL Predoc Course, Heidelberg, Germany, 2018.
- Basic Teaching Module part of EMBL Predoc Course: Phylogenetics, Tools for 3D molecule interactive visualization and R datasets. Heidelberg, Germany, 2016.

### Teaching assistant

- Linear Algebra. National Autonomous University of Mexico. Cuernavaca, Mexico, 2012.
- Seminars on Genomic Applications. National Autonomous University of Mexico. Cuernavaca, Mexico, 2011.
- Discrete Mathematics. National Autonomous University of Mexico. Cuernavaca, Mexico, 2010 and 2011.

## Skills and Interests

Programming languages R/Bioconductor, Bash. Basics of: Python, Perl and C.

Software ggplot2, Git, Singularity, PyMOL, UCSF Chimera, Modeller, MEGA, IGV, XCMS, L<sup>A</sup>T<sub>E</sub>X  
Languages Spanish (native), English (advanced), French (basic), Chinese (entry level)

Research interests Host-Pathogen interactions. Genomic approaches in infectious diseases.

Other interests Traveling, cooking, photography
